Continuation of 3. NOTE: The proposed claim amendments raise a new issue requiring further search.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the resin in Ota does not enclose the edging of the surface skin member but merely abuts it on one side. Claim 26, however, does not require the resin to enclose the skin member. Rather, claim 26 requires the skin member to be enclosed, but not specifically enclosed by the resin. Ota teaches the skin member is enclosed by the resin and the lower tool. Applicant argues that Hiraiwa does not teach the remaining portion of the inlay being accomodated outside the cavity while also being disposed in a space between upper and lower tools of a casting tool. Hiraiwa teaches a portion of the inlay outside the cavity where the resin is filled (figure 4, 11a).
